1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

**In the specification, page 1,**

**line 4, changed "10/\_\_\_ filed \_\_\_" to --10/233,366 filed September 3, 2002--;**

**line 6, after "2002" inserted --, both applications now abandoned--.**

**In claim 2,**

**Line 5, changed "secondaperture" to --second aperture--.**

**In claim 4,**

**Line 2, after "wherein" inserted --said at least one strap like member of--.**

2. The following is an examiner's statement of reasons for allowance: All claims containing "means-plus-function" language are considered to invoke 35 U.S.C. 112, paragraph 6. Prior art of record fails to show or fairly suggest a carpet slide having the combination as claimed, including at least one strap or its equivalent having a first end and a second end, "a first means" for engaging a first end of the strap, and "a second

Art Unit: 3677

means" for engaging a second end of the strap. Further, prior art fails to show a "securing means" or its equivalent for securing the recreational shoe to a wearer. As disclosed by the specification and asserted by applicant's arguments, "first means " and "second means" (claim 1) consist of two apertures (slots) (25) and "a securing means" (claim 16) consists of two apertures (25) and at least one strap member (15) with two ends. The two apertures are formed in the upturn perimeter edge (14) of a flexible sheet of plastic material and the first and second ends of the at least one strap are attached to the respective aperture by a hook and loop type material for securing the slide to a foot. Prior art to Koblick '355 has a single strap routed through at least 4 apertures. The ends of the strap are secure by a buckle (48). Engaging the ends of the strap of '355 to the first and second apertures renders the device inoperable. And, modifying a single strap to meet the invention as claimed may render the rejection hindsight since the prior art clearly emphasizes the use of "a single continuous strap" and "at least" four slots in the side wall.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
